DETAILED ACTION

Claims

Claims 1-18 are canceled, and claims 19-61 are added.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,606,142 B2. Claims 19-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,618,114 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because they all pertain to the use of polymerization initiation or

enhancement (PIE) and/or variation in methods and rates of polymerization before completion of polymerization.

Claims 19-61 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/309,908. Claims 19-61 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent of Application 09/882,272 (Allowed, but not yet published). Although the conflicting claims are not identical, they are not patentably distinct from each other because they all pertain to the use of polymerization initiation or enhancement (PIE) and/or variation in methods and rates of polymerization before completion of polymerization.

These are provisional obviousness-type double patenting rejections because the conflicting claims have not in fact been patented.

References cited but not applied are relevant to the instant Application.
